

# THE GLEICHEN CALL

VOLUME XXIX NO. 26

GLEICHEN, ALBERTA, WEDNESDAY SEPTEMBER 9, 1936

SUBSCRIPTION \$2.00 PER YEAR

## VISITORS ATTEND LAST MEETING LADIES S. C. GROUP

Mrs. Thomas Wilson was hostess at a very enjoyable semi-monthly meeting of the Meadowbrook Ladies Social Credit Group held last week. The attendance was good, the out of town visitors being: Mrs. Catherine MacArthur and Miss Thora Cunningham of Calgary. Roll call was answered with "Your own definition of a friend."

Following the business routine, the nine-patch quilt, which is now completed and which will be delivered this week to the Welfare Relief Board at Calgary, was displayed. The quilt is beautiful and a real credit to the group. A letter written by the secretary was enclosed. An interesting paper on "Psychology" was given by Miss Bessie Richardson. Current events were read by several of the members.

A reading by Mrs. Fred Hannas was much enjoyed, also Master Leslie Wilson gave a reading.

A delightful lunch was served by the hostess assisted by Miss Gladys Wilson. A tea collection was taken. The next meeting will be held at the home of Mrs. George Bell on Thursday, 17th of September at 3 p.m.

## POULTRY RAISERS TO HAVE FREE FLOCK APPROVAL AND BLOOD TEST SERVICE

As an encouragement to poultry raisers in the Province of Alberta who undertake Record and Performance under federal jurisdiction, the poultry branch of the Alberta Department of Agriculture, will provide free flock approval and blood test service this year to all flocks entered and in good standing, in R.O.P.

Full particulars with respect to making entry in R.O.P. and details of the work, may be obtained from the Dominion Live Stock Branch, Department of Agriculture, Ottawa. As the period for receiving entries closes early in the fall, these interested are advised to act with little delay as possible. G. M. Corrie, Poultry Commissioner, in making this announcement, points out that each year shows a decided increase in the demand for R.O.P. stock and this is another means whereby Alberta poultrymen can create additional markets for their products.

## PROTEST MINIMUM WHEAT PRICE

(From Calgary Herald, Sept. 1st). Directors of the Alberta Wheat Pool, meeting in Calgary for their regular monthly session, passed a resolution protesting against the fixed minimum and also the enactment prevents the wheat board accepting deliveries until the price level goes below 90 cents a bushel.

In the words of the resolution the ruling "was considered tantamount to ordering withdrawal of the wheat board from fulfilling the function for which it was formed."

The Pool board expressed the opinion that the federal government in its action had failed to consider its pre-election promise to market wheat at world levels and return to the growers in Canada a price commensurate with the cost of production.

"What the government's move virtually amounts to," the Pool directors stated, "is an order to the western growers to accept financial rewards for their labor based on world levels. What other class in Canada, outside primary producers, are thus treated?"

"We feel that the policy of the government is reactionary and that the interests of the wheat growers are not receiving the consideration they are entitled to, particularly in view of the considerable treatment given to wheat growers by the government of virtually every other important wheat growing country in the world."

"The Pools obtained a wheat board after a long struggle and view its forthcoming disintegration with a sigh of alarm and regret. The wheat problem is not solved by any means and Canada needs an active and aggressive wheat board."

It is said that there are thirty thousand people in Japan. Every country seems to have its trouble.

## News Items of Local Interest

Mr. and Mrs. L. Cuthbert of Meleed, spent the week end in Gleichen visiting friends.

R. D. McElroy, formerly on the staff of the Vulcan Advocate spent several hours in town last Friday.

Frank Woods who has been living in Inchnure for the past several months paid his relatives, in Gleichen, a visit for a few hours on Sunday.

In another couple of weeks the irrigation will be shut off in Glen. This brings one to the realization that winter is not far off.

Sunday was a close sultry day and rain fell towards evening. Monday more rain fell again drenching harvest to the dismay of those farmers who have not finished.

The Bow River is lower now than it has ever been known. The fishermen are taking advantage of that and are having better luck than they have had for years.

Mr. and Mrs. Jas. Eggle and son Teddy, and Irvin Gove returned from a three weeks holiday to the Pacific coast cities. All report having had a wonderful time.

Labor Day was an exceptionally quiet day in town. Most of the men spent a lot of time watching the construction work going on for Mr. McConnell's new office building.

The greatest crop of tomatoes and cucumbers the town has ever known is being harvested right now and preserved by the house wife. Thanks to irrigation practically every cellar in town will have its quota of food stuff stored away for winter.

Last week Chas. Thompson and his men laid down a concrete drive to the garage of the Taxaco Filling Station. The improvements made to his station during the past few months has made it a very attractive center.

Harry Brown, manager of Shorley Station, returned last week from away Carbon where he had been for the past several weeks looking after the harvesting of his crop. Mr. Brown stated he was well satisfied with this year's crop and that it yielded a little better than he expected.

## SIDELIGHTS

"What is the average man's idea of a really reliable lawn mower?" asks a local gardener. One that breaks down every time his wife orders him to use it.

There are mighty few young people who go into marriage with any real idea of what it means. They get their notion of it from among the clouds where they lived while they were engaged, and naturally about all they find up there is wind and moonshine, or from novels which always end before the real trouble begins, or, they keep on, leave out the chapters that tell how the husband finds the rent and the wife the hired girl. But if there's one thing in the world about which it's possible to get all the facts, it's matrimony. Part of them are right in the house where you were born, and the neighbors have the rest.

We have always been somewhat skeptical about the value of teaching foreign languages in the average public or private school. It has seemed to us that the smattering of foreign tongues thus acquired was not worth the time spent on them. Our attention has been called to a somewhat different type of school, which seems to have overcome this objection, and is said to employ a real two languages simultaneously, Canadian English and French. That is instruction in school subjects is given in both languages simultaneously. Canadian teachers teach subjects in English, while the French teachers give instructions in other subjects entirely through the medium of the French language. Reading and conversation in both languages is obligatory, by this method it is claimed that pupils soon learn to converse in French as easily as those reared in French homes.

Tom Wilson, who farms some three miles north of town states his apple trees did very well this year and that he has already picked many apples and used them in his home. A couple of years ago he had a splendid crop but on getting up one morning he discovered somebody had picked on tree clean, and since that time he has kept a wary eye on his trees. Mr. Wilson just recently built a new garage and is busy at present, putting down a concrete floor. When that is finished he will have an up-to-date garage and will be able to handle all kinds of work.

Those who turned the dial of their radios on KOA Sunday evening had the pleasure of hearing President Roosevelt speaking from the Checker Room of the White House in Washington. His talk was on the trip he had just concluded through the drought areas of the States which have been badly hit this year. We may think we had a dry spell in Alberta this summer, but after hearing the president describing the drought we realized we were in a wet belt. Great preparations are being made by the United States government to cope with the situation, and also relief plans on a gigantic scale to help the farmers over the results brought on by the drought.

There is a structure which every graduate from our school is building, young and old, and poor, each one for himself. It is called "character," and every act of your life is a stone for this structure. If day by day you are careful to build your lives with pure, upright deeds, at the end you will stand a fair temple, honored by God and man. But as one leak will sink a ship, and one flaw break a chain, so one mean, dishonorable act or word will forever leave its impress and work its influence on your character. Then let the several deeds you form a day and one by one the days grow into noble years, and the years as they slowly pass will rise at last a beautiful edifice, enduring forever to your glory, and you will cherish with the utmost tenderness the memories of your school life. The school house, the familiar walks about the place, the desk upon which you wrote your name, all indelibly stored away in memory never to be forgotten.

homes. Anyway the plan sounds sensible, and it should appeal to those who are genuinely interested in acquiring not merely a superficial knowledge of French but a practical mastery of that beautiful and expressive language.

We are repeatedly told that youth and age are not measured by years alone. Some are old fogies at 30; others have the spirit of youth at 80. How is this? An article in a recent issue of an educational journal expresses the idea of youth and age better than we could express it, so we quote in part: "Youth is not a time of life; it is a state of mind. It is a temper of the will, a quality of the imagination, a vigor of the emotions. Youth means, a predominance of courage over timidity, of the appetite of adventure over the love of ease. This often exists in a man of fifty more than in a boy of twenty. Nobody grows old by merely living a number of years. People grow old by deserting their ideals." There are hundreds of people extremely old in years, but young in spirit. They set a good example for the rest of us.

"Why do so many people go about with such long faces?" demands a preacher. A local wag suggests that it is because they happen to belong to them.

## UNITED GRAIN GROWERS DECLARE DIVIDEND

A dividend at the rate of three per cent has been declared by the directors of United Grain Growers Limited, for the financial year ending July 31st, 1936. Cheques will be mailed on September 15th, 1936, to shareholders of record at the close of business, July 1st.

## W. A. UNITED CHURCH HAVE RESUMED FALL MEETINGS

The W. A. of the United Church met at the home of Mrs. R. K. Hunter after a period of two months vacation. Mrs. H. Blich presided over the meeting. The attendance was good. The minutes of the last meeting were read by Mrs. H. C. James and a financial report was received from Mrs. R. K. Hunter.

Arrangements were made to have a garden party on Mrs. E. W. Taylor's lawn this Wednesday afternoon. Flowers are to be on exhibition from local gardens. A home cooking sale is to be held in conjunction with the garden party.

A dairy lunch was served by the hostess, assisted by Mr. W. E. Thompson and Mrs. Mahoney.

The October meeting will be held at the home of Mrs. G. H. Gooderham, on the first Thursday of that month.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

September 7, 1916. Eight out of nine Gleichen school children who wrote passed the high school entrance. They were as follows: Lorna Kaupp, May Jones, Marion Lewis, Jimmie Service, Ralph Preswick, Levitt Ramsey, Walter Laycock, Reddy Lafferty, Ruth Buckley also passed Grade X.

Mr. Plante has sold his threshing outfit to a party north of Red Deer river.

E. Ostrander presented The Call with a pair of mushrooms Tuesday.

Allen N. Lindsay spent the weekend in town with his family. He is now in the employ of the Credit Men's Association.

Word has been received that H. W. Lee died in Rochester last week. As his family went to see him it is impossible to get particulars at present.

Mrs. Capt. Ritchie of Calgary is visiting Mrs. McConnell. She will leave shortly to join her husband in England, who left along with the 137th battalion.

Saturday night one of the most vivid electrical storms known passed over the district. The thunder was terrific but the only damage reported was a few boards torn off the Pioneer elevator.

The rain spoiled the picnic for the Sunday school kiddies on Monday. Boys and girls form a procession and all call on the mayor and ask him to proclaim a public holiday for a public picnic. He was some kid once himself and even now remembers it so well he has not the heart to refuse you.

Our town secretary has troubles galore these days over the phone and otherwise. One hour he hears: "Why the blankety-blank don't you get these cows in pound. My trees and garden are ruined!" The next hour: "Why did you tell the pound-keeper to look after my cow? There will be trouble if you don't bring her home at once. It's real mean so it is to lock up Bessie."

Miss White and Mrs. Ramsbottom and children returned Friday from Vancouver after an absence of several months.

The parents of C. A. Klypper arrived from Weiser, Idaho, on an extended visit.

The Gleichen Threshing Company has decided to dissolve and is going to sell their outfit.

Some of the bachelors of the Craigantler district do not like to see the soldiers coming into the district. The uniform seems to take the girls by storm.

The French horse commission of five members spent Monday in town but did not buy any horses. The day was wet and stormy and only about a dozen horses were brought into town.

Mrs. Morrow and children of Calgary are visiting Mrs. Larkin. Her former friends are glad to see her once more.

Mrs. A. G. Edwards has returned to Cluny from an extended visit to relatives in various parts of the United States.

A very enjoyable dance was given last evening in honor of Misses Jean Gooderham and Lucy Marshall, who have since left to take up their studies in Calgary.

## GRAIN TRADE AND MINIMUM PRICE

The Western Producer in its issue of September 3rd, referring to the decision of the government in regard to the minimum price for wheat and its reception by Western farmers, says:

"To them and to many of those whom they elected it must have come as a cruel disillusionment to find that their government chose to listen to and be guided by the grain trade and other reactionary elements in their midst while refusing even to acknowledge the subsidization of organized agriculture."

The implication that the grain trade or any section of it has at any time made representations to the Government, or to the Canadian Wheat Board, or has ordered advice to those bodies, relative to the establishment of the minimum price for wheat at 87½ cents per bushel or any other figure, is absolutely false.

The interests of wheat producers and of the grain trade are identical in regard to grain prices. The prosperity of the grain trade in Canada is bound up with the prosperity of producers. It has no interests in keeping prices down. The figure at which the minimum price should be set is a matter to be decided by the government having in view the loss it might be prepared to sustain in the event of a decline in world wheat values. The grain trade has repeatedly stated its belief that producers must be assisted to overcome the adverse conditions resulting from drought and excessively low prices. But it has been opposed to attempts to fix the price at which Canadian grain should be offered in the export markets or to hold Canadian wheat at prices above its relative value in world markets because such attempts must result in (a) loss of markets and diminution of sales, (b) the creation of burdensome surpluses, (c) eventual loss both to producers and taxpayers, and (d) encouragement of uneconomic and high-cost production by our competitors.

In continuance of the open market for grain and the preservation of every available channel through which Canadian grain can be sold are to be found a guarantee of the best returns to Canadian producers. To maintain such returns is as much the desire and interest of the grain trade as of the producers themselves.

There is room for honest difference of opinion as to what the minimum price should be. But there is no justification for false imputations of motive and act.

## A Quid Pro Quo

If the Dominion government is to open the gates ajar for the admission of more British migrants to Canada on a colonization basis, it would seem appropriate to suggest that any agreement which may be made should include some provision for the sale of more Canadian produce in the Old Country.

From the viewpoint of Western Canada where new settlers must necessarily engage in a competitive venture with farmers who, in recent years at least, have been forced to offer their wares in narrowing markets, such a proposal would only be a reasonable quid pro quo for accepting new settlers.

It is true that colonization schemes in general and the Hornby scheme in particular, which are now being mooted and are apparently being accorded serious consideration in some quarters, contemplate safeguards to ensure that for at least five years after admittance to the country migrants would not become charges on the administration and that failures would be returned to the country of their origin.

While this may be regarded by some people as satisfactory on the face of it, such safeguards are not sufficient for the protection of thousands of farmers in the prairie provinces who during the past five or six years have not only experienced the greatest difficulty in making a bare livelihood but have had the misfortune to be aggrued—and are still staggering—under an accumulating burden of indebtedness.

Such colonization schemes, insofar as the west is concerned, have land settlement as their objective which means, of course, that the newcomers will be engaged in the production of agricultural commodities. If they are successful in their efforts the volume of produce offered for sale must necessarily increase with a resultant tendency to reduce returns to all producers of similar commodities.

The only way that this trend can be offset is the creation of new or expansion of existing markets for such produce and the latter might be attained by agreements which will ensure a greater volume of sales of Canadian farm products in the country from which the migrants come. Such agreements, if consummated, coupled with rigid guarantees that the new settlers will be self-supporting, might be expected to at least minimize any indirect loss which the older settlers would sustain as a result of ensuing competition.

New Zealanders, who have been sounded out on the subject of British migration to their country have something of the kind in mind, as evidenced by the report of William Teeling, who recently visited Australia and New Zealand to examine opportunities for British settlement in the two Antipodean countries, for with respect to New Zealand, he is quoted in a recent issue of the London Times as stating:

"From both these Dominions I came away with the impression of young people in young countries convinced of the future of their race, convinced that they had something to interpret from the West to their neighbors in the Far East, and convinced that they still had a lot to do in their own countries before they were ready to admit too many strangers. They seemed, however, quite willing to admit a few under careful and proper auspices."

"It struck me that the best opening was in New Zealand, and that there it could only be achieved through the New Zealand Government (not other large body being sufficiently interested) and by a definite economic bargain for the purchase of New Zealand goods."

Without going into details of the reasons advanced, Mr. Teeling found that prospects for British migration to Australia were practically hopeless at the present time.

Thus it would appear that any British colonization in New Zealand must necessarily be very limited and must be accompanied by an economic pact as a consideration, a suggestion that should certainly be given great weight by Canadian authorities before any agreement is entered into for additional colonization in this country.

Proponents of further colonization in this country have argued that new settlers are consumers as well as producers. This is true, but if they are to be successful they must produce more than they consume, in which event a market must be found for the excess production somewhere. If they do not produce more than they consume, colonization is for them a failure and it would be better for them and the country, if the scheme were abandoned before birth.

### Professor Makes Discovery

Finds Green Peppers Contain The Precious Vitamin C

The green peppers that Professor Albert Azent-Georgy, Szeged, Hungary, spurned at dinner one night gave him the chief source of precious vitamin C he had sought for a long time.

On that particular evening his wife had revoked her ban on his after-hours work, and he retired to his laboratory to continue his hunt for the anti-scurvy substance.

He took the peppers with him, intending to eat them later. But instead, he subjected them to tests just as he had almost everything else available—and found what he wanted in the vegetables that abound in the neighborhood.

In a few weeks he managed to produce a pound of pure vitamin C from 4,000 pounds of green peppers which, he discovered, have four times the vitamin C content of oranges and lemons, and are cheaper.

### Bear's Head On Coin

Monarch II, last known survivor of the California valley grizzly bears, now in San Francisco Golden Gate bear pit, is to be immortalized. His head will grace a coin commemorating the completion of the San Francisco-Oakland Bay bridge.

### Manufactures Wind

Full-sized aeroplanes can now be fully tested before being actually flown, in a wind-tunnel at the Royal Aircraft Establishment at Farnborough, England. In this huge apparatus winds up to 115 miles per hour can be manufactured to order.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ravis' to Go

The liver should pour out two pounds of bile into your bowels every day. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Get back your stomach. You get constipated. Harmful poisons go into the body and you feel sick and the world looks black.

A new bowel movement down takes away all the pain. You need something that works on the liver as well. It takes time. Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. The liver produces bile but has no natural or natural in them. Ask for Carter's Little Liver Pills. Name! Obviously refuse anything else. See.

### Wonder House On Exhibit

Everything Electrically Operated In New Type House

Ease and convenience for persons lacking domestic servants and spare time were revealed in a "wonder house," on exhibition at New York.

There was an electric range which turned itself off when a roast was done to a crisp, doors that opened without being touched to admit housewives with armfuls of dishes, and illuminated keyholes for husbands arriving home late after long meetings.

In the nursery an electric eye set off a series of chimes when anyone approached the baby's cradle, and a burglar alarm buzzed when the window near the cradle was opened, to make it difficult for kidnappers.

When closet doors were opened, lights immediately flashed on inside. An electrically-operated goldfish bowl with floodlights and an underwater air fountain required only one change of water each month.

### Another Mystery To Solve

Reason Silica Turns Into Poison When Pulverized

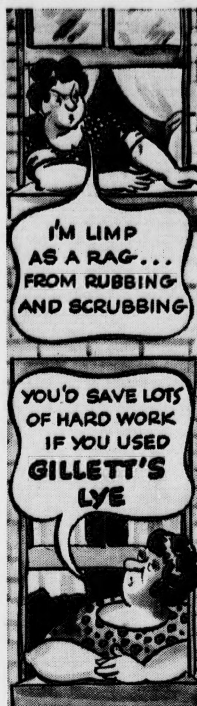

Science has one mystery yet to solve in silicosis, the most dangerous of all dust diseases.

The mystery is why silica, the dust responsible, turns into a poison when ground to particles the size of bacteria. The surprising behavior of silica was explained at the Harvard tercentenary by Dr. W. Irving Clark and Prof. Philip Drinker at the Harvard school of public health.

Beach sand is almost pure silica. Silica is part of the beauty of opals and occurs in quartz, flint, sandstone, jasper and many other common substances. In all of them it is harmless to human beings.

When ground fine enough to fly in the air particles of silica cause a distinct, new lung disease.

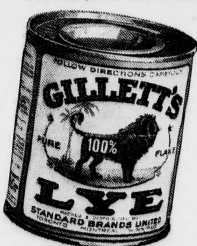

Trees breathe through tiny openings on the under side of their leaves. A single apple leaf has more than 1,400 of these pores.

**WASHES DIRT AWAY**  
—no rubbing and scrubbing

Cleaning jobs are quick and easy with Gillett's Pure Flake Lye. Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing. Use it for toilet bowls, too—and to clear sluggish drains. It kills germs, destroys odors. Never harms enamel or plumbing. Get a tin from your grocer—today!

\*Never dissolve lye in hot water. The action of the lye itself heats the water.

**FREE BOOKLET**—The handy Gillett's Lye Booklet shows how the powerful cleanser and disinfectant can save you hard work... contains complete instructions for making soap at home... tells how to keep farm equipment and buildings clean and sanitary. Be sure to send for free copy. Just write: Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

### Japan's Low Labor Cost

Enables Them To Undersell Other Countries' Home Products

The St. Catharines, Ontario, Standard says a copy of the Knit Goods Weekly, U.S.A., received in their office, contains an article which shows that cotton hosiery from Japan is making tremendous strides in the market to the South. It is shown that if the tariff were raised fifty per cent to what it is now, Japan could undermelt the home product by 18.6 per cent, all due to the low labor costs of the Japanese. Male hosiery knitters in Japan earn \$2.00 a week and female \$1.25. That is the story behind the industrialization and world market drive of the Japanese manufacturers.

A Scot entered the shop where he had recently bought a bicycle. "It's about the bike, mon," he said. "Hain't it arrived yet?" said the shopkeeper.

"It has," said Jock, "but where's that free wheel?"

Does the 4,000 to one odds against an air raid on London, quoted by Lloyd's, mean that the British air fleet is better than London has been telling the world it is?

### Not Very Long Ago

Boston Had By-Law Forbidding Bathing Without Doctors Order

Cleanly Anglo-Saxons on both sides of the Atlantic have been shocked at the revelation, by an American plumber who has just returned from a European tour, that though the Hohenzollern Palace at Potsdam contains 800 rooms, there are only two bath-rooms in it. And the plumber found, also in Germany, a castle of 260 rooms which had no bath-room at all.

But there was a time when the Boston city fathers passed a by-law forbidding anyone to have a bath except by doctor's orders, and this was not repealed till 1862. Again, just over 100 years ago, when the Lord Mayor of London asked for a shower bath to be installed at the Mansion House the request was refused, as "the need of same has not been heretofore complained of."—London Answers.

### Building Without Stairs

Will Have Ramps So Car Can Park On Any Floor

Hotels and offices in which cars can drive to any floor and houses with more than one floor, but no stairs, are being designed in London. The buildings will have ramps, like those in some large garages. The young designers claim that their plan will do away with traffic congestion, make it possible for dwellers to drive their own cars into the building and park them outside their doors, make roofs into car parks, and provide overhead roads. The inventor is an architect, Dr. M. Hoenig. Already buildings on his principle are being put up in Leeds, England and in France. The Leeds building will contain a 150 bedroom hotel, a 170 car garage in the basement and a motion picture theatre. Cars can be driven right into the building, ascending to any floor.

### Little Animal Has Courage

Man Tells How Gopher Rescued His Helpless Mate

The gopher, unassuming and somewhat petty animal, attains heights of courage that move him a better name, says A. D. Bain, superintendent of a chain of bungalow camps in the Canadian Rockies.

On a recent inspection trip, Bain saw as he approached in his car an injured gopher lying helplessly in the middle of the road. Nearby stood another of the little animals, bristling and showing his teeth, although obviously frightened.

When Bain stopped the car, the second gopher put his test into the scruff of his dying mate and dragged her to the safety of the long grass beside the mountain road.

### Lightning Kills Birds

Found Underneath Large Tree Which Was Not Struck

Included among the frenzies of the severe lightning storm which struck Raleigh, North Carolina, was the electrocution of between fifty and sixty sparrows roosting in a tree which was not struck by lightning. The sparrows were found underneath the large tree. Since the tree was not struck it is believed the heavily charged air, coupled with the current given off by electric wires in the vicinity, resulted in the electrocution.

### Gives Excellent Results

Excellent results from blood-testing poultry flocks are reported from all parts of Canada. A breeder in British Columbia who had his flock blood-tested last fall at a cost of \$18 sold hatchery eggs to the value of \$608 to one of the commercial hatcheries. At a sale of Record of Performance certified stock by an Ontario breeder to a breeder in the United States, R.O.P. certified females sold for \$5 each and an R.O.P. male for \$15.

## "The Object of his Affections"

You said it—Ogden's Fine Cut! Men who roll their own cigarettes have a yen for Ogden's, because Ogden's does roll a cooler, sweeter, smoother smoke. If you're not already acquainted with Ogden's, take a little tip—try this mellow, fragrant cigarette tobacco. 'Yes, sir, you'll like Ogden's Fine Cut and you'll like the way it's packaged, too—Cellophane-wrapped with the purple easy-opening ribbon. Be sure to choose the better papers—"Chantecler" or "Vogue".

**OGDEN'S FINE CUT**

P.S.—Your Pipe Knows Ogden's Cut Plug

### SELECTED RECIPES

#### PUMPKIN PIE

- 1½ cups pumpkin
- 1 desiccated flour
- 1 cup sugar
- 1 teaspoon ginger
- 1 teaspoon cinnamon
- ¼ teaspoon nutmeg
- ½ teaspoon mace
- ¼ teaspoon salt
- 3 eggs
- ½ cup milk

Mix pumpkin, flour, sugar, spices and salt together; beat eggs, add milk and stir all well together. Pour into a deep pie plate lined with good pastry. Bake until firm (about 35 minutes) in a moderate oven.

#### Just Recently Known

Twenty-five per cent. of the vegetables and fruits people eat were unknown even ten years ago. They come from strains of plants that didn't exist a decade past. Cantaloupes, for instance; a popular item on many tables. A few years ago it was scarcely possible to produce them because they were afflicted by a mildew. A scientist discovered a species in India that resisted mildew and by cross breeding, made the plants of this continent.

After 400 years, one of the best-known "ports of call" along London's waterside, The Turk's Head Inn, Wapping, has been closed.

### Hundreds Of Suggestions

Lord Mayor Of London Receives Ideas For Memorial

Several hundred suggestions for a King George Memorial have been received by the Lord Mayor of London and he and the King George Memorial Fund is considering them. Among them are renaming Trafalgar Square, King George Square, removing Nelson's Column and the lions to Tower Hill, erecting statues of King George and his four sons, and placing the Cenotaph in the centre of the square are some. A flood-lit Mausoleum in Hyde Park is another. The erection of a colossal flood-lit statue on the cliffs of England, near Lecon-sault, similar to the Statue of Liberty in New York, visible at sea for 20 miles, is still another.

#### Has Supple Fingers

Leo M. Stender, of Walters' Union, No. 18, of New York City, by the genius of his supple fingers, can produce, at a moment's notice, from a plain table napkin a bishop's mitre, a wedding candle, a sailboat or a clown grinning under a fool's cap. He demonstrated his prowess recently before a meeting of the Hotel and Restaurant International Alliance in Rochester, N.Y.

According to a correspondent of Collier's, an undesirable alien is a foreigner who makes more money than he does.

## Thou Shalt Not Love

A NOVEL BY GEORGIA GRAIG

CHAPTER V.—Continued

Start thought she had never seen anything quite so comfortable as the man-sort of place with its crimson leather chairs, bookcases with dim lights over them and low, comfortable chairs, each with its own particular light. There were scatter rugs, dim-hued and velvety and the gleam of copper or brass here and there, and she held her breath as it took her straight back home—a painting on one wall of Egyptian gods and goddesses who stood in their stiff-bodied stances of dress, with geometrical hands and draped bodies making the same old mysterious signs at each other, signalling.

"The man caught Start's eyes, saw something in them he did not understand, nor did he care.

"Just a few of your pals," he said. "Thought you might like them. You might catch up a bit of chatter with them while I tell you what we'd like to eat."

Over the supper they talked, undisturbed. But it was a talk of consequence that it was a table of scarcely touched food as their eyes

held each other's in long moment of appraisal.

The man's elbows rested on the table and he leaned close. The girl's slim fingers twisted nervously in her lap as her glance fastened to where she had dropped her coat on a red leather chair. A faint color crept beneath the pallor of her cheeks, feeling him look at her the way he was looking.

It was then, after they had fended to the point of one or the other lunging for a body blow, that he made the most astounding proposition a man ever made to a girl.

He explained in his clipped voice: "There hasn't appeared any particular need for mentioning it before, but my name is Michael Fairbourne. The next in the biography confession is that I work for the Tarrance Publishing Company. One of our recent novels is 'Play-Girl.' Heard of it?"

Start nodded. Heard of it? Who hadn't? "Play-Girl" was on everybody's lips. One of those sensational best-sellers which come once in a blue moon. Some of them come every few years, of course; others are in the "Three Weeks" class and make a devastating disturbance of their own. But it was the consensus of opinion that "Three Weeks" was a Victorian and skimpy sort of tome, one which ought to be on every Sunday-School library shelf compared with "Play-Girl." "Play-Girl"—a daring, risqué story of an ultra-modern woman's love—and sin. Her own unregenerate, unrepentant life-story—of a life still too young really to be called a life, but—

Michael Fairbourne said curtly: "I wrote it."

Start caught her breath incredulously. "You! You wrote it? But I thought—"

"So does everybody else," he said grimly. His face was as flushed as her own, and he appeared to be uncertain just how he wanted to continue. But he plunged on headlong. "The company I work for ballooned in as the confession story of a woman who had signed, a true story written by the anonymous 'Play-Girl' herself. He shrugged his big shoulders and waited the space of time it took him to light a cigarette. "That's baloney, of course. I wrote the thing on an impulse, and it got away from me. Have you ever known the feeling of starting a small thing rolling, much as you've

## RHEUMATISM SPREAD TO ALL HER JOINTS

Obtained Relief by Using Kruschen Salts

Here is a sad story of suffering, but it has a happy ending. This woman was attacked by severe rheumatism which spread to all her joints. But Kruschen brought relief as she describes below:

"I feel it my duty to tell you how Kruschen Salts brought me relief from a severe attack of rheumatism. I had rheumatism in my legs and knees, later spreading to every joint in my body. This lasted over a period of 13 weeks. I was then ordered to bed with acute rheumatism. I was recommended to try Kruschen and before finishing the second bottle I was able to perform my normal duties."—(Mrs. L.D.)

Rheumatic conditions are frequently due to an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid. Other ingredients in these Salts assist Nature to expel the dissolved uric acid through the natural channels.

probably made a snowball when you were a kid, and then finding that it has grown wildly beyond your control? Well, that's what happened to 'Play-Girl.' The last thing I ever dreamed of in the world was that it would cause such a sensation. Now the public is clamoring for the author to be revealed—a sort of 'personal appearance' command, as it were, and my publisher demands that I either slither forward and confess myself the damn fool author of the damn fool book, or else produce an author who would be more in keeping."

Start interrupted, not understanding what he was driving at. Her acquaintance with publishers had been with those who had published her father's tomes on archeology. It had not occurred that any person could go to the tremendous trouble of putting down on paper enough words to fill a whole book and then shrink from the acclaim of authorship.

"Well," she asked wonderingly, "why don't you admit your identity and take the fame that's coming to you? I should think it'd be marvelous to be a real author."

"Who? Me?" Michael snapped, and he gave a short laugh. "Fame? Notoriety's the word! And certainly no credit to the kind of masculine

brain that could evolve such truck. No I can't do it."

"Why did you write it then?" Start wondered, but he was paying her no attention.

"I might as well make a clean breast of the whole thing while I'm about it," he said, as his jaw clamped firmly. "Truth is, there's a girl I love to marry. Stephanie Dale. The Dales are one of the oldest, proudest families in New York—which might not be saying a great deal, at that, except that they're among the few real old New Yorkers who still talk a great deal about dear Old Uncle Great-great-and-so-on. Peter Stuyvesant and make their family prayers to a wooden leg. That old hokey means a lot of them yet, and if they ever found out that I was the author of the scandalous 'Play-Girl,' it would be all off between me and Stephanie."

Start said, "Oh," very softly. Those few words of his spoke volumes about the life of Michael Fairbourne. Not for nothing had she been born in the shadow of Old South Church and been reared in the refined atmosphere that spreads over Beacon Hill. Though not for Michaels would she ever have had Michael Fairbourne guess that—not now. But somehow she hated to think of him in the role of social climber. To any extent. It just didn't seem to fit.

The hard young face so near to hers was very intense. Apparently the scheme of things he had mapped out for himself meant a great deal to Start's Broadway "Hassan." Suddenly he was talking to her as intimately as though he had known her a lifetime. Much as if it were a relief to express in words the thoughts he had been forced to keep to himself. He went to great lengths to explain himself to the black-eyed youth of the girl opposite him, in a burst of almost boyish earnestness.

"You see, even if Stephanie did not complicate matters, and if it did not look so silly for a big lummock like me to have got any such effusion out of his system, I still could not reveal myself without making a lot of others look as assinine as myself. The author of 'Play-Girl' has got to be 'Play-Girl' herself. Otherwise the whole thing would be exposed as a gigantic hoax. . . . It isn't done—not any more. If I get what I mean, and know anything about the publishing business, my publishers are not looking for hoaxes. That would ruin the role of my book, and baby! are we going strong? It would ruin them—and me, which is more to the point!"

Start asked quietly: "And just where do I figure in this intriguing little story?"

Michael Fairbourne smiled audaciously and leaned back, watching the play of her features.

"You," he said with slow emphasis, "are going to make your debut in New York City as the notorious 'Play-Girl'—the woman who lived my story, and yes, by heaven, who wrote it, too, without a single ghost. You look as if you could have."

Start drew a long, startled breath. For a second things went dizzy and the little flames in the fireplace were dancing a funny little devil's dance. She had a confused impression of burning gray eyes, a laughing mouth, and the spell of a man's attraction which was stronger than anything she had ever known. His crisp voice cut into her confusion:

"The first moment I heard you on the Avenue this morning crying out that you wanted to play, I knew you were the one for the job. I was more certain of it when I had a glimpse of you late this afternoon and you disappeared before I got a second sight of you."

(To Be Continued)

## Blind Phone Operator

Former War Veteran Handles Intricate Hospital Switchboard

Telephone calls from all over the world pass through the intricate switchboard of the London Hospital, the largest voluntary hospital in England, at the rate of about 800 a day. Yet this vital cog in a hospital of 750 beds is controlled by a blind former service man.

Horace Manning is the man. He was totally blinded while serving with the Sixth City of London Regiment, and was trained as a telephone switchboard operator. He has been at the London Hospital for fifteen years. He never makes a mistake, although he handles eight exchange lines and thirty-seven extensions. He has memorized the numbers of all the doctors and hospital officials. After each toll or trunk call he moves over to a typewriter and types full details of the call for reference.

Casimira was the ancient Italian town where Mark Anthony was reputed to have held his orgies, and where, at the foot of a mountain, the Romans constructed a still-existing amphitheatre.

## Visited Dying Soldier

New Story Proves Again Kindness Of King Edward

The dedication by King Edward VII. of Canada's memorial to her dead at Vimy has inspired the publication of anecdotes of His Majesty's last visit there as Prince of Wales. One, hitherto unrecorded, runs as follows:

Some years after the war an ex-soldier was dying, friendless, in a hospital. His only visitor was a well-known padre. As death drew near the man expressed a desire to see the King—then Prince of Wales—whom he had known in France.

The padre understood and dashed to York House, only to be told that the Prince had retired for the night. Evidently the Prince heard and recognized the caller's voice, for a few minutes later, clad in pajamas and dressing gown, he came down stairs and the visitor explained his mission.

"I remember the man," replied the Prince, "and I must see him. I am tired, but as he is so ill we had better go at once. Tomorrow may be too late."

They left hurriedly. "Tiptoeing along the ward," says the Ypres Times, which recalls the story, "the Prince went straight to the man's bedside. He took the man's hand and remained thus for some time."

"The man was too far gone to speak, but he opened his eyes and gave a smile of recognition and gratitude. Then he lapsed into a state of coma. . . . That afternoon he died."

## Find Undersea Channel

American Coast Guards Have Discovered Old River Bed

Tentative evidence that the Mississippi River once flowed far to the south, through land that since has fallen into the Gulf of Mexico, has been found.

Existence of an undersea channel, such as a river bed, was discovered by soundings from the U.S. Geodetic Survey ship Hydrographer. After taking up supplies at New Orleans, the Hydrographer returned to the Gulf to study the phenomenon.

"Recordings of coast guard experts told of a depression, one to two fathoms in depth, running east and west, fifteen miles south of Terrebonne Bay and Timbalier Island. It is not far from the 10-fathom limit off the coast and is expected to extend beyond this line."

The course of the channel seems to be in the same direction as the present Mississippi Valley further to the east, and further study is expected definitely to settle a theory that geologists long have held. Their idea is that the rich Mississippi Valley country originally extended far south and that for hundreds of years the land has been sinking into the Gulf.

Soundings of the Hydrographer are taken at the rate of four a second. The ship works north and south over a limited area. Similar geodetic surveying is being carried on along the entire American coastline.

## Little Helps For This Week

Thou wilt keep him in perfect peace whose mind is stayed on Thee, because he trusteth in Thee. Isaiah 26:3.

What comforts, Lord, to those are given, Who seek in Thee their home and rest; They find on earth an opening heaven, And in Thy peace are amply blest.

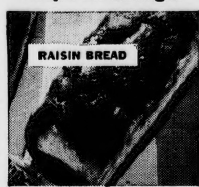

God is a tranquil being and abides in a tranquil eternity. So must your spirit become a tranquil pool where, in the serene light of God can be mirrored. Therefore shun all that is disquieting, within and without. Nothing in the whole world is worth the loss of your peace. Endeavor to obtain a quiet and peaceful spirit, for God is full of peace and happiness. Avoid all anxious care and vexation which darkens your soul and renders you unfit for the friendship of God. If you perceive these feelings rising, turn away from them.

Peanuts have more carbohydrates than potatoes, more fat than cream, and more protein than meat.

## WRAPPED AIR-TIGHT

ROYAL YEAST CAKES Keep Full Strength

RAISIN BREAD

SANDWICH ROLLS

APPLE CAKE

Use Royal Yeast Cakes and Royal Sponge Recipes for these good breads . . .

These famous dry yeast cakes secure perfect leavening. Fine quality is one reason . . . careful packing is another. Every Royal Yeast Cake is separately wrapped. Air-tight—it keeps fresh. No other dry yeast has this protection. The standard for over 50 years—Royal Yeast Cakes are now prepared by 7 out of 8 Canadian women who use dry yeast. Order a package.

## Perfect Driver Rare

Tests Show Most Of Them Have Some Weakness

Dr. Silva, head of the traffic research department of Harvard University, has tested a large number of drivers, and it is his opinion that the auto driver who clicks on all phases of the tests is exceptional, because nearly everyone has some driving weakness of which he is unaware. So it means a large number depend upon your judgment. A generous share of courtesy is a good thing to observe.—Chatham News.

The Egyptian Government will operate gold mines on the Red Sea coast.

**LAYERBILT EVEREADY RADIO B BATTERY**

**THE ONLY BATTERY BUILT IN LAYERS..**

**Most "B" BATTERIES look very much alike on the outside. But it isn't what a battery looks like that counts—but what it does. Underneath the jacket of some brands of batteries, are small round cells. The heart of a Layerbilt is a series of tightly packed layers. In the old-fashioned round-cell type, note the waste space in the "Air Pockets" around the cells. But the Layerbilt is all battery—solid layers containing 25% more power-making materials than a round-cell battery of the same size. And because the exclusive construction uses up the maximum of these materials, Layerbilt gives 40% more power. Layerbilt costs a little more at first—but saves you plenty in the end. Of all "B" batteries on the market, Layerbilt gives you "More Hours per Dollar"—longer life, trouble-free service.**

**This year—Layerbilt comes to you with an extra improvement—the "plug-in" which eliminates all terminal posts and gives you only one connection for each "B" battery.**

## Town & District

Miss Thora Cunningham of Calgary is visiting with Miss Eileen MacArthur for a few days.

Miss Eleanor McNaughten, of the Blackfoot hospital staff has returned after holidaying in the States.

Miss Lily Carriek of the Alberta Government Telephones accompanied by her sister-in-law and Miss Muriel Hamar left for a month's holiday at the coast.

Bob Cardinal formerly of the local branch of the Canadian Bank of Commerce and now of Melod, spent the week-end in town renewing old acquaintances.

The Calgary Presbytery of the United Church will meet in Knox United Church, Calgary, on Thursday, Sept. 10, with morning, afternoon and evening sessions. The minister and one lay representative from Gleichen are expected to attend.

The Junior W. A. of St. Andrew's Church, under the superintendence of Mrs. Deshayes, will resume their regular meetings on Wednesday, September 23rd. Mrs. Gervill has kindly invited the Juniors to hold their first meeting after the summer holidays at her home.

The C. P. R. stream-lined train will be in Gleichen tomorrow evening, Thursday, at 6:13 o'clock and will remain for ten minutes. If you want to give this train the once over from end to end be on hand. The railway company invites the public to go and see it.

According to the Vulcan Advocate a suggestion has been proposed by merchants, that the business houses of that town open at 9 a.m. and close at 5 p.m. during the winter months. From November 1st to March 1st. Some of the Gleichen business men when told of the idea thought there was a lot to commend in it and wondered why that could not be done here adding that stores have longer hours the year round than most business.

Announcement has been made by Mr. H. E. Sellers, president of the Alberta Pacific Grain Co. Ltd., that K. C. Allen had been appointed general manager of the Company to succeed J. R. Murray, who formerly occupied that post, and is now Chief Commissioner of the Canadian Wheat Board. Mr. Allen was formerly western manager of the Company. His headquarters will remain at Calgary. Mr. Allen is well known in grain circles in Winnipeg and Vancouver as well as throughout Alberta.

### GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, minister.  
Mrs. H. Birch, choir leader.  
Miss Jean Parquharson, pianist.  
11 a.m. Church School.  
7:30 p.m. evening worship. Subject: "The Great Gamble."

The sermon is not a condemnation of gambling but rather an endorsement of it in some of its forms and is addressed particularly to young people. If there are young people who look upon religion as a dry stuffy sort of life that has no appeal for strong, red-blooded people they should hear this sermon.

### ISSUES FINANCIAL STATEMENT OF A. P. GRAIN CO.

Operations of the Alberta Pacific Grain Company Limited for the year ended June 30th last resulted in a loss of \$12,414.52 compared with a profit of \$4,491.13 for the previous year, according to the financial statements made public by H. H. Sellers, president of the company. Bond interest of \$104,283.67 was net and \$351,322.93 added to depreciation reserves. In view of the uncertainty of the outlook for the coming year on account of the poor harvest in Western Canada, necessity of considering further extension of suspension of sinking fund operations in connection with the company's \$3,500,000 first mortgage bond issue will be considered by the directors during the current year, the report indicates.

The report of the directors to the shareholders states, in part: "Further improvement of \$284,253.47 in working capital position was effected during the year. The arrangement made with the first mortgage bondholders in 1934 for the suspension of sinking fund payments for a period of three years, expired on June 1st, last. The result of operations during the current year will be the deciding factor on whether application for an extension of suspension of sinking fund payments will be made to the

## A Matter of Principle

If grain growers do not fight for their own interests, who will aid them?

The Alberta Wheat Pool is continually striving to improve the lot of the grain growers.

Better protection and better prices is the objective sought.

The Pool is the only grain handling organization keeping up the battle. It fights alone, among commercial concerns, for a living wage for grain growers.

The grain growers can most effectively help by delivering their grain to
